

## DOUBLE - PITCH ROOF 15 ° KEDER HALL, MOBILE

*The ideal solution to match the construction progress by moving section by section.*

### FEATURES:

- roof pitch: 15°
- for spans up to 19.0 m
- easy to move by hand
- highly economical due to optimized use of material
- rails do not need to be laid exactly parallel, since the rolling frame permits equalization in the transverse direction
- highly durable, translucent Keder tarpaulin
- can be mounted on façade and modular scaffolding
- system - independent application
